

QUICK SET UP INSTRUCTIONS

Behold your Atom Inflatable Stand Up Paddle Board securely packed in a durable backpack.

Make sure you have the following items: (1) Board, (1) 3-Piece Paddle, (1) Removable Center Fin, (2) Removable Side Fins, (1) Pump, (1) Pump and Hose, (1) Patch Kit including Patch, Patch Applicator and Glue.

Unfold your board. Make sure top of board, with traction pads and logo, is facing upwards.

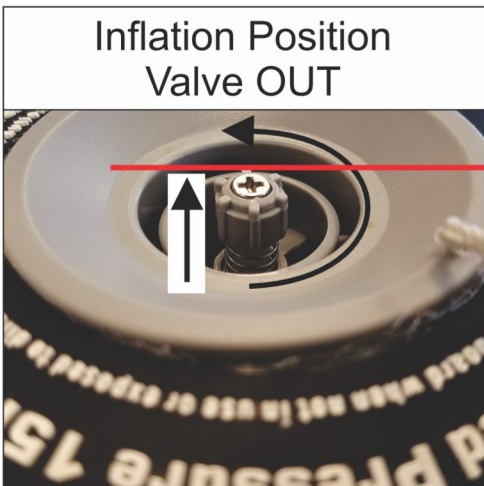

Attach Hose to Pump.

Screw end of hose onto pump in a clockwise direction until tight.

Remove Valve Cap by turning counter clockwise.

Make sure Valve is in the Outward position by rotating counter clockwise. This allows air to go in but to not escape.

To release air make sure Valve is in the Inward position by pressing down and rotating clockwise.

Insert end of Hose into Valve.

Rotate Hose in a clockwise direction approximately 90 degrees. Collar should be tight and flush with the Valve.

Start pumping. The ideal pressure is 10-15 psi. Refer to pressure gauge on top of pump. Unscrew Hose from Valve and re-attach Valve Cap.

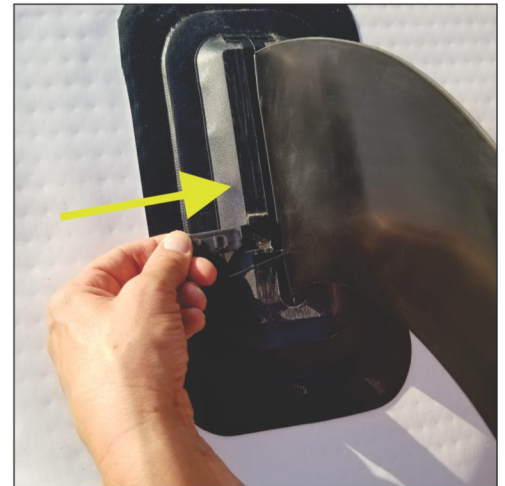

Once filled, flip board over and install Removable Center Fin.

Align Fins into the Fin Slots so that the Fin Arches are facing the rear of the board.

Push Fins into slots.

Insert Fin Clips through the holes in the Fins.

Push until you hear a click indicating it is fully inserted..

Assemble your Paddle. Paddle has 3 parts. The Handle, the Center, and the Blade.

Insert the Center Shaft into the Blade section.

Push Center Shaft into Blade Shaft until Paddle Pin aligns with the Hole in Blade Shaft. You will hear a "click".

Adjust Handle length to your approximate height.

Tighten Clamp.

You now are ready to go!
